

CRISTIAN NARVAEZ

FULLSTACK DEVELOPER & DATA ANALYST

crissnar12xd@gmail.com • +57 (320) 296-6323 • [LinkedIn](#) • [Portfolio](#)

ABOUT ME

Fullstack Developer and Data Analyst with experience in React, TypeScript and Python, along with analytics tools such as Power BI and Power Query. I have led the automation of administrative processes and the development of strategic dashboards at a public institution, combining software development with data analysis. I work under the SCRUM methodology, with a focus on clean architecture and continuous learning.

EXPERIENCE

Data Analyst — Servicio Nacional de Aprendizaje (SENA) — Regional Cauca | April 2025 – Present

- Cleaned and processed data using Python and Power Query for institutional reports.
- Built interactive dashboards in Power BI for strategic analysis and decision-making.
- Developed predictive models for enrollment projections of SENA training programs.
- Built Fullstack applications to automate administrative and registration processes, with automatic updates to Power BI.
- Designed automation workflows with n8n to update reporting databases.
- Used generative AI to streamline administrative processes; set up local Debian servers.

Junior Front-End Developer — BPOLabs Solutions | February 2024 – October 2024

- Developed Front-End features in React + TypeScript under “Clean Architecture” principles, using Zustand for global state management.
- Implemented responsive interfaces (Tailwind, NextUI) with a “Mobile First” approach, including integration with the ConnectUp company project.
- Consumed and integrated Back-End services via Axios (interceptors, endpoint-level permission handling).

EDUCATION

Computer Engineering — Institución Universitaria Colegio Mayor del Cauca | February 2025 (In progress)

- Built Fullstack applications applying data structures (queues, stacks and graphs).
- Back-End projects with Java and Spring Boot.
- Descriptive data analysis with R.
- Designed databases with roles and permissions in PostgreSQL and MongoDB.

Technologist in Software Analysis and Development — SENA | Degree earned Dec. 2024

- Trained in the MERN stack; developed the Back-End of the capstone project “RPM – Rutas Para Moteros” (Node.js, Express, MongoDB).
- 1st place nationwide at SENASoft 2023, Data Engineering category (SQL Server, SSIS, SSAS, Power BI).

SKILLS

React.js • TypeScript/JavaScript • HTML5/CSS3 • TailwindCSS • Node.js/Express.js • Java / Spring Boot
Python • R • Power BI • Power Query • Excel • n8n • SQL Server / MySQL / PostgreSQL / MongoDB
Microsoft SSIS/SSAS • Clean Architecture • Git/GitHub • Figma • Docker • Postman/Vercel • ClickUp • Debian (servers) • Next.js
